EXPERIENCE

Software Engineer Fellow – Develop for Good

May 2026 – Present

Remote

- Selected as a Develop for Good Fellow to help rebuild the website and online presence for **One WillCo**, a nonprofit focused on educational equity
- Contribute to frontend engineering, UX improvements, SEO-focused planning, and maintainable website architecture in an Agile team environment
- Collaborate with engineers, designers, project managers, and nonprofit stakeholders to translate client needs into technical solutions

IT Intern – Town of Huntington, Housing & Building Division

Jun 2025 – Present

Huntington, NY

- Digitize and organize municipal records in Laserfiche to improve permit retrieval, document access, and internal record management
- Tag archived records with metadata such as owner names and addresses to reduce staff search time and support workflow accuracy
- Support public records processing, content management, and compliance workflows across municipal department operations

PROJECTS

FitGPT – AI Outfit Recommendation Platform

Jan 2026 – Present

Senior Capstone Project

- Develop responsive frontend features for an AI-powered outfit recommendation and wardrobe management application using **React** and REST APIs
- Implement wardrobe CRUD operations, favorites, image rendering, profile updates, and recommendation workflows with backend integration
- Collaborate in Agile sprints using GitHub, Trello, Render, and PostgreSQL-backed services to test and improve deployed features

SolarShare – Community Solar Access Platform

Oct 2025 – Present

Hult Prize National Competition – Boston, MA

- Develop **SolarShare**, a community solar platform inspired by the **PSEG Long Island Innovation Challenge** to help households access solar credits without rooftop installation
- Represent Farmingdale State College at the **2026 Hult Prize National Competition** while presenting renewable energy access, user adoption, and platform impact
- Contribute to React frontend design, user experience, routing, responsive layouts, and clear product messaging for PSEG Long Island customers

StockVision – AI-Driven Stock Forecasting

Jun 2025 – Aug 2025

AI4ALL Ignite Program

- Built a React-based stock forecasting platform with dynamic search, prediction charts, and confidence interval visualizations for beginner investors
- Worked with ARIMA and Prophet forecasting models using stock market datasets to compare short-term prediction accuracy
- Presented model evaluation, accessibility choices, and UI/UX design decisions at the AI4ALL project showcase
